

Supplementary Fig. 1. Box plots for expressions of LRG1, TTR, and CA19-9. Comparison of NL and PDAC levels of (A) LRG1, (B) TTR, and (C) CA19-9 from multi-panel enzyme-linked immunosorbent assay kit. The levels of log-transformed NL and PDAC of (D) LRG1, (E) TTR, and (F) CA19-9 were also shown. The asterisk represented the arithmetic mean of each NL and PDAC data. LRG1, leucine-rich alpha 2 glycoprotein; TTR, transthyretin; NL, normal; PDAC, pancreatic ductal adenocarcinoma.
