

Supplementary Table 4. Effect of possible factors for postoperative length of hospital stay after excluding appendectomy and cholecystectomy cases (n = 603)

Factor	β	SE	t	P-value
Age group	1.567	0.721	2.174	0.030
ASA PS classification	1.272	0.693	1.835	0.067
Type of operation	1.299	0.417	3.113	0.002
Sepsis	8.744	2.696	3.244	0.001
Complications	19.540	1.654	11.815	<0.001
Constant	-0.744	2.589	-0.287	0.774

SE, standard error; ASA PS, American Society of Anesthesiologists physical status.

Adjusted $R^2 = 0.293$, $F = 51.0$ ($P < 0.001$).
