

Supplementary Table 2. Univariate analysis of overall survival and disease-free survival after paraaortic lymph node dissection in the M1a group

Variable	Overall survival		Disease-free survival	
	HR (95% CI)	P-value	HR (95% CI)	P-value
CEA, >5 ng/mL	1.656 (0.370–7.404)	0.510	4.157 (0.592–29.181)	0.151
SYNCH-PALNM	0.278 (0.033–2.315)	0.237	0.102 (0.008–1.219)	0.071
No. of severity factors				
1	1		1	
≥2	6.957 (1.398–34.620)	0.017	11.758 (1.796–76.968)	0.010

M1a group, patients with isolated paraaortic lymph node metastasis; HR, hazard ratio; CI, confidence interval; SYNCH-PALNM, synchronous paraaortic lymph node metastasis with primary cancer. Severity factors were analyzed with only paraaortic lymph nodes, not including regional nodes of primary cancer.
